EXPERIENCE

Modec | Tech: Azure, FastAPI, Django, ReactJS, AI Engineer, Devops Ho Chi Minh City, Vietnam
Software Engineer *May 2025 – Present*

- Designed and delivered an intelligent Document Mapper system leveraging Azure Document Intelligence with caching and change detection to extract structured data from millions of PDFs, resulting in eliminating manual navigation of large files and significantly boosted user productivity.
- Engineered report platform using FastAPI async generators and a master-slave DB architecture for interval-based prebuilds. Reduced export wait times and cut hosting costs by 50% without impacting live queries.
- Independently built an internal workflow automation system using Django and React, processing uploaded files with complex calculation logic and generating structured summary reports, resulting in eliminating manual work and accelerating digital transformation for internal teams.
- Developed a near real-time monitoring and alerting solution with Azure Application Insights, Log Analytics, and Logic Apps, improving incident response time by 80% and increasing system reliability.
- Proposed and led the adoption of a feature flag system, persuading the team to embrace safer release practices. Enabled consistent weekly releases, reduced production risk, and improved deployment confidence.
- Proactively secured the platform by migrating all credentials to Azure Key Vault, eliminating secret leak risks and aligning with enterprise compliance standards.

Employment Hero | Tech: Ruby on Rails, Sidekiq, SQL, Redis, Kafka, gRPC, Sentry Remote
Junior Backend Software Development Engineer *Apr 2024 – Apr 2025*

- Designed and implemented an auto-saving mechanism for user comments across multiple devices, resulting in improving user experience, encouraging more engagement and increasing user retention across platforms.
- Designed and implemented a career progression feature leveraging polynomial regression model to forecast user salaries.
- Designed and integrated Braze webhook to automate WhatsApp notifications for shortlisted candidates in Malaysia and Singapore, while ensuring the security and stability of the server through robust safeguards.
- Migrated CI/CD Pipeline for services from CircleCI to GitHub Actions, resulting in a 5x reduction in costs.
- Identified and optimized multiple inefficient queries, gRPC calls and resolved unit test issues, resulting in significantly faster processing times and enhanced system performance.
- Detected and fixed critical issues in the authentication flow for private APIs, contributing to the overall integrity and security of the system.

Athena Studio | Tech: Python, FastAPI, GCP, Redis, SQL, Airflow Ho Chi Minh City, Vietnam
Software Engineer *Nov 2022 – March 2024*

- Develop and maintain robust pipelines for automated data collection from diverse sources to warehouse, contributing significantly to the analysis of company revenue and cost.
- Implement a monolithic high-throughput system, processing and storing millions of events daily from diverse clients by utilizing Google Cloud Pub/Sub, contributing to a 25% of system costs reducing.
- Implemented an microservice in-app purchase system, managing the processing, verification, and storage of user notifications and receipts during payments, empowering mobile teams with streamlined tracking and analysis.
- Refactor legacy code, restructuring folders, introducing unit tests, and rewriting deprecated services, resulting in a 35% increase in efficiency for adding new feature while enhancing code readability, and maintainability.

EDUCATION

Royal Melbourne Institute of Technology Vietnam Ho Chi Minh City, Vietnam
Bachelor of Software Engineering; (Honours First Class) *Sep 2019 – Sep 2023*

CERTIFICATIONS

- Google Cloud Essentials.
- Serverless Cloud Run Development.

SKILLS & LANGUAGE

Skills: Back-End/Full-Stack Web Development, AI Engineer, Ruby on Rails, Cloud Development, Serverless Development, Python, FastAPI, Django, Microsoft Azure, GCP, SQL, NoSQL, Bigquery, Terraform, Docker, TypeScript, HTML, CSS, ReactJS, OOP, Monolithic, Distributed System, Microservices, gRPC, Linux, Redis, Message Queue, Caching, Devops, Kubernetes, REST APIs, GraphQL, Background Task, Agile Software Development, Version Control Systems (GIT), Algorithms, Data Structure, SOLID, Design Pattern, RDBMS, ORM, Unit Testing, Integration Testing, Teamwork and Communication, Critical Thinking, Problem Solving, Debugging Proficiency, Monitoring.

Languages: Full professional proficiency in English.
